

Communication

Project: EduGenie: Google Gemini Powered Learning Assistant

Team ID	Team Size	Team Leader	Team Members
SWTID-2026-5228	5	Madhubala G	Pavithra G, Logeswari G, Sivapriya W, Gopika M

Communication Plan

Aspect	Details
Presentation Clarity	Logical flow: problem, solution, demo, testing, future plan. Every member speaks
Team Coordination	Defined roles, agreed order of speakers and smooth handover between members
Language	Simple, clear language; avoid too much technical jargon
Time Management	Stay within 6 minutes; the leader signals if time runs short
Backup Plan	If internet or the API fails, show recorded demo or screenshots

Expected Questions and Answers

Question	Suggested Answer
Which AI model does EduGenie use?	Google Gemini, accessed through the Gemini API with the google-genai Python SDK.
How is the API key kept safe?	It is stored in a .env file and read as an environment variable. It is not written in the code or uploaded to GitHub.
What if Gemini gives a wrong answer?	AI can make mistakes, so students are advised to verify important facts from their textbooks or teachers.
How is EduGenie different from a normal chatbot?	It is built for learning: level-based explanations, summaries, quizzes and study plans in one place.
What happens when the API fails?	The app shows a friendly error message instead of crashing.
Can it be extended?	Yes. A new feature needs one new prompt function and one new tab. See the Scalability and Future Plan.
