

Code-Layout, Readability and Reusability

Project: EduGenie: Google Gemini Powered Learning Assistant

Team ID	Team Size	Team Leader	Team Members
SWTID-2026-5228	5	Madhubala G	Pavithra G, Logeswari G, Sivapriya W, Gopika M

Project Folder Layout

```
EduGenie/  
|-- app.py           (UI layer)  
|-- gemini_utils.py  (AI logic layer)  
|-- requirements.txt  (dependencies)  
|-- .env             (secret key, not uploaded)  
|-- README.md        (setup and usage)
```

Code Layout, Readability and Reusability

Criterion	How EduGenie addresses it
Layout	UI (app.py) and AI logic (gemini_utils.py) are in separate files
Readability	Meaningful function names, docstrings, short functions, consistent formatting
Reusability	One ask_gemini() function is reused by all four features; only the prompt changes
Configuration	API key and model name are read from the .env file, not hard-coded
Error handling	Missing key, empty input and API failures show friendly messages instead of crashing
Maintainability	A new feature needs one new prompt function and one new tab
