Project: EduGenie: Google Gemini Powered Learning Assistant

Team ID	Team Size	Team Leader	Team Members
SWTID-2026-5228	5	Madhubala G	Pavithra G, Logeswari G, Sivapriya W, Gopika M

1. Before You Start

- Install Python 3.9 or higher.
- Run: `pip install -r requirements.txt`
- Create a `.env` file and add `GEMINI_API_KEY=your_api_key_here`
- Start the app with: `streamlit run app.py`
- Open the local link shown in the terminal in your browser.

2. Using EduGenie

Tab	How to use	What you get
Ask a Doubt	Choose your level, type your question, click Explain	A simple explanation with an example
Summarizer	Paste your notes, click Summarize	Short bullet-point summary
Quiz	Type a topic, choose the number of questions, click Generate Quiz	MCQs with answers and explanations
Study Plan	Enter subject, number of days, hours per day, click Create Plan	Day-wise study plan
Sidebar	Open Chat History	Questions asked in this session

3. Tips

- Ask one clear question at a time for better answers.
- Choose the level that matches you: beginner for first-time learning, advanced for deeper detail.
- Check important facts in your textbook, because AI answers can sometimes be wrong.

4. Troubleshooting

Problem	What to do
Message says GEMINI_API_KEY is missing	Add the key to the <code>.env</code> file and restart the app
Message says Gemini could not answer	Check internet, API key, and free quota, then try again
Model not found error	Set GEMINI_MODEL in <code>.env</code> to a model name available in Google AI Studio
Answer is slow	Use shorter input or fewer quiz questions
